

Blockboard

Blockboard

Blockboard is made up of a core of wood strips. These strips may be up to about 25mm wide. The strips are placed edge to edge and sandwiched between veneers of hardwood. The sandwich is then glued under high pressure.

Thickness (mm)	Size (mm)	Core
12	1220x2440	Paulownia/Poplar/Combine
15	1220x2440	
18	1220x2440	

Applications

Blockboard is only suitable for interior work, as the glues used in its construction are not waterproof. Such as Decorative, shelves, doors, paneling and partitions. The boards should be stored flat as blockboard can twist or warp. If you decide to paint the surface, it is wise to paint both sides in order to equalise the surface tensions, which will aid the shaping of the blockboard.
